Temperature of the room--if the room was warm, work was much slower than usual; if too cold the same result was noticeable. 3. Interruption of any kind barred progress. This was especially true with the children. Once their minds were off their work, it was hard for them to concentrate themselves upon it again for some time. 4. Mind-wandering --thinking of outside things--caused decrease in rapidity of action. 5. If subjects were in a hurry, for any reason, the work was slower than usual. 6. Weariness from school work made a great difference in the records. 7. If an unusually strong effort was put forth to do the work quickly, without fail...
