Book Condition: New. Publisher/Verlag: Springer, Berlin | Proceedings of an international conference held in Miami Beach, Florida, November 8-10, 1996 | The 1996 Conference focused on topics of environmentally attractive technologies for electricity production-renewables, natural gas, and nuclear energy. Recent technology developments were addressed which include creation of more efficient photovoltaic converters for electricity generation; the current and future role of natural gas in meeting global demand for electric power generation; and the status of nuclear energy, its various applications, and the prospects for its future. The Conference agenda, in light of its global economic impact, included comparative discussions of all the above alternative energy sources. The regional choice of energy sources and their impact on the global economy and environment was reviewed. In addition to the above subjects, but strongly connected with the theme of global energy needs and security, the Conference program contained one session on new needs and directions in higher education: new curricula to cover fundamental global issues on energy, resources, and environment. | Presentations on the International Conference on Technology for the Global Economic, Environmental Survival and Prosperity; R.A.
