

Information Technology in Health Science Education

Filesize: 3.06 MB

Reviews

It is one of the most popular pdfs. It really is full of knowledge and wisdom. It has been developed in an exceptionally easy way and it is just right after I finished reading through this publication by which it really altered me, altered the way in my opinion.

(Dr. Alexa Rogahn)

INFORMATION TECHNOLOGY IN HEALTH SCIENCE EDUCATION

DOWNLOAD

Book Condition: New. Publisher/Verlag: Springer, Berlin | This first volume is but an introduction to the growing use of computer-based systems in health-science education. It is unlikely that the intellectual or applied system constructs herein are either exhaustive of the field or immutable; growth is inevitable. For one thing, the field is still fractured and loosely organized, which is an inevitable description of an adolescent science in a rich mine of ideas. There is emerging, however, an organizing concept. A short look into the future indicates that educational system design will be dominated by a concept which, for want of a better term, we may call an "information system." Actually, this term derives from an early New York World's Fair exhibition designed by Charles Eames entitled the "Informational Machine," in which the designer illustrated once again his insight into the future by showing how in a fundamental manner the digital computer promised to affect and to change our lives; and this change is by no means completed. Even during the publication of this volume, the basic sciences requisite to the development of an information machine have evolved significantly. The three intellectual areas to watch are developments in artificial intelligence, graphics and man/machine interaction, and basic component and computer system design. | 1 Introduction.- 2 CAIDENT: Dental Education Marching to the Beat of a Different Drummer.- 3 Computer-Supported Independent Study in the Basic Medical Sciences.- 4 Dental Education.- 5 Computer-Assisted Instruction in Health Professions Education: Guidelines for Utilization.- 6 Planning for Educational Communication Networks.- 7 Sharing Computer-Based Simulations for Clinical Education.- 8 The LHCBC Experimental CAI Network, 1971-1975: An Administrative History.- 9 The PLATO System: An Evaluative Description.- 10 CAIREN: A Network for Sharing Health Care Learning Resources with Ohio Health Care Facilities and Educational Institutions.- 11 Health Education...
