

Exploring Water with Young Children Teacher's Guide (Paperback)

By Ingrid Chalufour, Karen Worth

Redleaf Press, United States, 2005. Paperback. Book Condition: New. 274 x 211 mm. Language: English . Brand New Book. Looking at science in a new way, Exploring Water with Young Children focuses children's explorations to help deepen their understanding of water and its properties including concepts related to water's flow, appearance and effect on objects. The third unit in the Young Scientist Series, this field-tested curriculum supports the early development of important science inquiry skills such as questioning, investigating, discussing and formulating ideas and theories. Karen Worth is a graduate-level instructor in the early childhood education department at Wheelock College. Ingrid Chalufour has designed and conducted training programs for a variety of early childhood staff for more than 35 years. Both authors live in Newton, Massachusetts.

Reviews

This publication may be really worth a go through, and a lot better than other. It really is written in simple terms and never difficult to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Natalie Abbott**

This book will not be simple to get going on reading but extremely exciting to read through. Yes, it can be playful, still an interesting and amazing literature. I am very easily could possibly get a delight of reading a written book.
